

**Consortium**

11 participants from 6 countries

**SolarDesign at a glance**

- Project start date: January 2013
- Project duration: 36 months
- Consortium: 11 participants/6 countries
- Funded: in FP7-NMP Programme
- Budget: 3,712,054.93 M€
- EC Funding: 2,716,423.0 M€

## Our Mission

Nowadays the development of photovoltaic modules is still primarily driven by the idea of economies of scales which leads to unvaried PV modules that are only good for large-area installations.

The project addresses these obstacles by the development of novel solar cell materials, manufacturing processes and supportive actions to improve communication in the design value chain.

## Our Objectives
